

Acquire the participants,
using the organiser as the vehicle.

WHO WE GO AFTER

Friend groups on milestone trips

Where the organiser is already a Roamly user.
Birthdays, bachelor weekends, reunions. Four to ten people, one self-appointed organiser, an occasion that carries the price.

WHY THIS ONE FIRST

- Already in the funnel. Near-zero acquisition cost.
- Highest revealed intent. They did the manual work anyway.
- Each group exposes 5 to 9 non-users at high trust.
- Same experiences, hosts and brand. Only coordination is new.

WHAT WE ARE NOT DOING

No paid acquisition at launch

The demand is already in the funnel and the distribution is already earned. Buying traffic would obscure whether the motion works.

HOW WE KNOW IT WORKS

LEADING

Participant-to-account conversion per group booking

The join flow works. This is where drop-off lives today.

SUCCESS

Participants who book their own experience within 90 days

You acquired a user, not a record.

WARNING

High join rate with low 90-day booking

Dormant accounts being counted as growth.

WHERE THE BRAND SITS

Extend, do not move

Roamly stays curated local experiences. Groups is a way in, not a new category.

POSITIONING

For friend groups planning a trip that matters, Roamly Groups turns the part the organiser dreads into something the platform handles, so everyone gets to be on the trip instead of running it.

OPEN

What a champion actually receives: recognition, early access, or revenue share.

Decide before Module 5 pricing.
